Plano, TX 75024 | Open to Relocation

PROFESSIONAL SUMMARY

- Around 11+ years of IT experience in Build & Release Management, Configuration Management, CI/CD Automation, Cloud Infrastructure and DevOps methodologies on Linux and Windows environments.
- Extensive experience in AWS (EC2, S3, VPC, IAM, Route53, CloudFormation, EKS, Lambda) and Microsoft Azure (VMs, AKS, Blob Storage, Azure DevOps, ARM Templates).
- Hands on experience writing Infrastructure as Code using Terraform modules, Ansible playbooks and Chef cookbooks.
- Experienced in containerization using Docker and orchestration using Kubernetes, Helm charts and OpenShift.
- Good working knowledge on scripting languages such as Python, Shell, Bash, Groovy and PowerShell.
- Involved in 24/7 production support, root cause analysis and worked closely with onsite/offshore model.
- Excellent communication skills, self-motivated and a good team player with ability to work independently.

TECHNICAL SKILLS

Cloud Platforms: AWS, Microsoft Azure, GCP (basic), OpenStack

AWS Services: EC2, S3, ELB, ALB, VPC, IAM, Route53, RDS, CloudWatch, CloudTrail, CloudFormation, Lambda, EKS, ECS, SNS, SQS, Auto Scaling

Configuration Management: Ansible, Chef, Puppet, SaltStack

Infrastructure as Code: Terraform, CloudFormation, ARM Templates

CI/CD Tools: Jenkins, Bamboo, TeamCity, Azure DevOps, GitLab CI, ArgoCD, Spinnaker

Containers: Docker, Kubernetes, Helm, OpenShift, Docker Swarm

Version Control: Git, GitHub, Bitbucket, SVN, GitLab

Build Tools: Maven, Ant, Gradle, MSBuild, NPM

Monitoring Tools: Nagios, Splunk, ELK Stack, Prometheus, Grafana, Datadog, AppDynamics, New Relic

Scripting Languages: Python, Shell Scripting, Bash, Groovy, PowerShell, Ruby, YAML, JSON

Databases: MySQL, Oracle 11g/12c, MongoDB, PostgreSQL, DynamoDB, Cassandra

Web/App Servers: Apache Tomcat, JBoss, WebLogic, WebSphere, Nginx, IIS

Operating Systems: RHEL 6/7/8, CentOS, Ubuntu, SUSE, Solaris, Windows Server 2008/2012/2016

Ticketing/Other: JIRA, ServiceNow, Confluence, Remedy, Rally, Agile/Scrum, SAFe

PROFESSIONAL EXPERIENCE

Infosys Limited

Sr. DevOps Engineer

Charlotte, NC

Mar 2022 – Present

Client: Bank of America

- Designed and implemented multi-account AWS landing zone using Terraform modules and AWS Control Tower for approximately 40 application teams.
- Migrated legacy Jenkins freestyle jobs to declarative Jenkinsfile pipelines stored in Bitbucket, reducing build failures by around 30%.
- Built and maintained EKS clusters, wrote Helm charts for microservices deployment and integrated ArgoCD for GitOps based delivery.
- Automated AMI baking process using Packer and Ansible, which brought down server provisioning time from 2 days to under 1 hour.

- Worked on setting up Prometheus and Grafana dashboards for cluster level monitoring along with alertmanager integration to PagerDuty.
 - Implemented HashiCorp Vault for secrets management and removed hardcoded credentials from more than 200 pipeline configurations.
 - Participated in daily scrum calls, sprint planning and coordinated with offshore team in Bangalore for 24/7 coverage.
- Environment: AWS (EC2, S3, IAM, EKS, Lambda, CloudFormation), Terraform, Jenkins, Docker, Kubernetes, Helm, ArgoCD, Ansible, Packer, Vault, Python, Shell, Bitbucket, Prometheus, Grafana, JIRA, RHEL 8.

Cognizant Technology Solutions

DevOps Engineer

Franklin Lakes, NJ

Aug 2019 – Feb 2022

Client: Cigna Healthcare

- Administered Azure DevOps organization including build pipelines, release pipelines, artifact feeds and self hosted agent pools.
- Created ARM templates and later converted them to Terraform for provisioning AKS clusters, storage accounts and virtual networks.
- Containerized around 25 .NET and Java applications using Docker and deployed onto AKS with Helm.
- Configured ELK stack for centralized logging and created Kibana dashboards used by application support teams.
- Wrote PowerShell and Python scripts for automating certificate renewals and patch compliance reporting.
- Involved in blue/green deployment strategy implementation which reduced production downtime windows significantly.

Environment: Microsoft Azure, AKS, Azure DevOps, ARM Templates, Terraform, Docker, Kubernetes, Helm, ELK, PowerShell, Python, Git, JIRA, Windows Server 2016, RHEL 7.

Tata Consultancy Services

Build and Release Engineer

Dallas, TX

Jan 2018 – Jul 2019

Client: AT&T Communications

- Managed end to end build and release process for 12 Java based applications using Maven, Jenkins and Nexus.
- Maintained Git branching strategy (GitFlow), performed merges, resolved conflicts and created release branches for every sprint.
- Deployed WAR/EAR artifacts to WebLogic and Tomcat servers across DEV, QA, UAT and PROD environments.
- Automated repetitive deployment tasks using Shell scripts and Ansible playbooks.
- Coordinated CAB approvals through ServiceNow and participated in weekend production release calls.

Environment: Jenkins, Maven, Nexus, Git, Ansible, Shell Scripting, WebLogic, Tomcat, Oracle 12c, ServiceNow, RHEL 6/7.

Wipro Technologies

DevOps / Build Engineer

Phoenix, AZ

Apr 2016 – Dec 2017

Client: American Express

- Set up Chef server, wrote cookbooks and recipes to configure application servers and standardize OS hardening across 300+ nodes.
- Built continuous integration pipelines in Jenkins integrated with SonarQube for static code analysis and quality gates.
- Provisioned EC2 instances, configured ELB, Auto Scaling groups and S3 lifecycle policies in AWS.
- Wrote Python utilities to parse CloudWatch metrics and generate weekly capacity reports for management.

Environment: AWS, Chef, Jenkins, SonarQube, Maven, Git, Python, Shell, Nagios, CentOS 6, Apache Tomcat.

HCL Technologies

Linux Systems Administrator

Sunnyvale, CA

Jun 2014 – Mar 2016

Client: Juniper Networks

- Administered 250+ RHEL and CentOS servers including user administration, LVM, NFS, patching and kernel upgrades.
- Performed OS installations using Kickstart and automated post build configuration through Bash scripts.
- Configured Nagios monitoring, set up custom plugins and handled P1/P2 incidents within defined SLA.
- Supported VMware ESXi virtual infrastructure and performed VM provisioning as per capacity requests.

Environment: RHEL 5/6, CentOS, VMware ESXi, Nagios, Bash, Kickstart, NFS, LDAP, Apache, Remedy.

Syntel Inc.

Systems Engineer

Troy, MI

Sep 2012 – May 2014

Client: FedEx Services

- Provided L2 support for Linux and Windows servers in a hybrid data center environment.
- Wrote shell scripts for log rotation, disk space monitoring and automated backup verification.
- Assisted senior engineers in the migration of physical servers to VMware virtual machines.
- Documented standard operating procedures and knowledge base articles in Confluence.

Environment: RHEL 5, Windows Server 2008, VMware, Shell Scripting, Apache, MySQL, Remedy, Confluence.

Polaris Software Lab

Associate Software Engineer

Hyderabad, India

Jul 2011 – Aug 2012

- Worked as part of the application support team for a core banking product deployed on WebSphere.
- Executed SQL queries against Oracle 11g for data validation and defect analysis.
- Assisted in nightly batch job monitoring and escalated failures to the development team.

Environment: Java, WebSphere, Oracle 11g, UNIX Shell, Autosys.

EDUCATION

Master of Science in Information Technology from University of Houston – Clear Lake, Houston, TX

Bachelor of Technology in Computer Science, Jawaharlal Nehru Technological University, Hyderabad, India

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Certified Kubernetes Administrator (CKA)
- Microsoft Certified: Azure Administrator Associate
