WHO I AM

Mechanical engineer turned reliability lead. Twelve years across automotive and aerospace manufacturing, currently owning predictive maintenance for four plants. I care about the boring stuff that keeps lines running.

WHERE I'VE WORKED

Reliability Engineering Manager

04/2020 – Present

Safran Aircraft Engines, Villaroche

Own predictive maintenance across four plants covering 1,200 assets. Cut unplanned downtime 31% by deploying vibration monitoring and rebuilding the CMMS work-order taxonomy. Lead a team of nine technicians and two data analysts.

Senior Maintenance Engineer

08/2016 – 03/2020

Renault Group, Sandouville

Reduced mean time to repair on the body-in-white line from 210 to 96 minutes. Introduced root-cause analysis reviews adopted by three sister plants.

Maintenance Engineer

09/2012 – 07/2016

Michelin, Clermont-Ferrand

Commissioned two new curing presses and wrote the preventive maintenance schedules still in use.

ACADEMIC BACKGROUND

Diplome d'Ingenieur in Mechanical Engineering

2007 – 2012

Ecole Centrale de Lyon, Lyon, France

AREAS OF EXPERTISE

Predictive Maintenance; Vibration Analysis; Root Cause Analysis; FMEA; SAP PM; CMMS; Lean Manufacturing; Six Sigma Green Belt; Python; Power BI

LANGUAGE SKILLS

French (Native); English (Fluent); Yoruba (Native); German (Basic)

PROFESSIONAL DEVELOPMENT

Certified Maintenance and Reliability Professional (CMRP), SMRP, 2019

Six Sigma Green Belt, ASQ, 2017
